

CASCAPOL

THE NAME THAT STICKS
UREKA

Non-Foaming Joinery Wood Glue

CASCAPOL SETS THE DEFINING STANDARD OF GREEN ADHESIVES

Engineered for demanding woodworking and joinery applications, including external joinery, furniture assembly, doors, windows, and marine environments. It delivers a high-performance, D4-rated waterproof bond with a fast 10-minute bond time and excellent with modified timbers such as Accoya.

Its advanced formula resists water and environmental wear, while the non-foaming, odourless composition ensures easy application and clean-up. Free from solvents and water, this eco-conscious adhesive offers a safer, cleaner working experience without compromising on performance.

For added convenience, we recommend the Cascawipe adhesive cleaning wipes which provide a quick and effective solution for cleaning hands, tools, and timber surfaces after use.

Key Benefits

- | | |
|--|---|
|  Bonds modified timbers |  Non-foaming |
|  Easy cleaning |  Chemical resistant |
|  100% solids |  Bonds in 10 minutes |
|  Solvent and water free |  Over coatable with water based coatings |
